

[illegible]

Where state, county, and/or MCD/CDD boundaries coincide, the map shows the boundary symbol for only the highest-ranking of these boundaries.

- 1 A " " following an MCD name denotes a false MCD. A " " following a place name indicates that a false MCD exists with the same name and FIPS code as the place; the false MCD label is not shown.
- 2 Place label color correlates to the place fill color.

The figure consists of two side-by-side maps. The left map, titled "Location of County within State", shows the outline of the state of Alaska. A small rectangular area in the central-southern part of the state is highlighted in yellow, representing the county. The right map, titled "Sheet Location within Entity", shows the outline of the highlighted county. A smaller rectangular area within the county's boundary is highlighted in yellow, representing the specific sheet location.

Projection: Albers Equal Area Conic
Datum: NAD 83
Spheroid: GRS 80
1st Standard Parallel: 54 33 10
2nd Standard Parallel: 68 03 30
